

PROMARK IMAGING

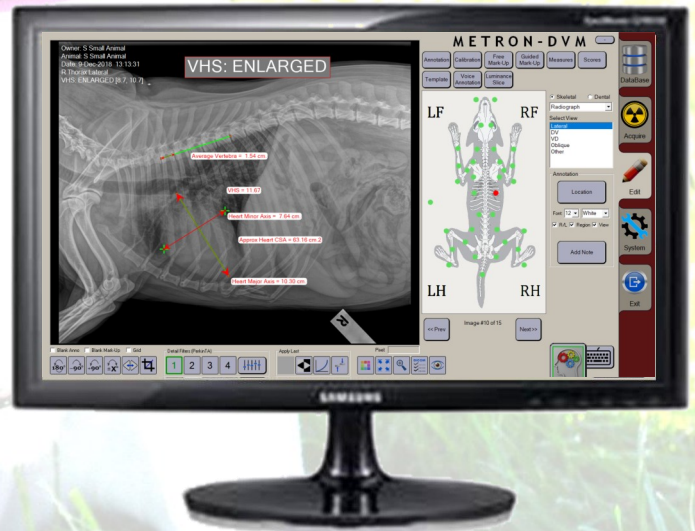

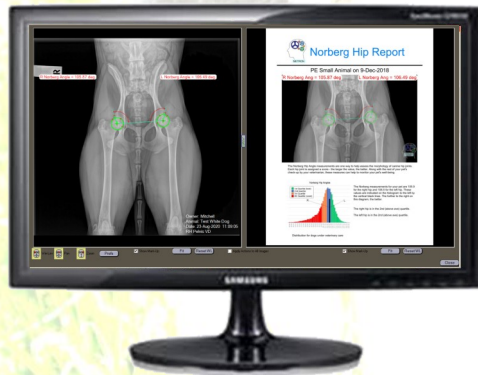

Solves your DR needs...

UltraMaxx-Z

A superb & cost effective, Flat Panel Digital Detector for Every Veterinary Practice!

Inserts into your existing cassette tray in seconds!

The world's *FIRST and ONLY* Artificial Intelligence (AI) Module for Veterinary Digital Imaging—the exclusive METRON “Intellect Engine” for effortless Image Acquisition, Analysis, Reporting and Network/PACS Distribution

Scientific Markup Includes: Vertebral Heart Score, Norberg Hip, TPLO/TTA, DAR, and Distraction Index Measurements as well as comprehensive Free Mark Up

ULTRAMAXX-Z Detector Specifications:

- *Image Matrix: 35 x 43 cm (14 x 17 inches)
- *ISO4090 CASSETTE SIZED PANEL! Only 3 KG !
- *Sensor Type: a-Si TFT (Thin Film Transistors-PIN)
- *High Definition GOS Ultra or HD CSI Direct Deposit
- *AED - FULLY AUTOMATIC EXPOSURE DETECTION !
- *No connection to X-Ray Generator required
- *Pixel Pitch 140 micron
- *Resolution: Nominal 4.0 + lp/mm
- *Dimensions: 46 x 38 x 15mm
- *Operating Temperature Range: 5 - 35 Degrees Celsius
- *WIRELESS OPTION !

CSI Cesium Iodide

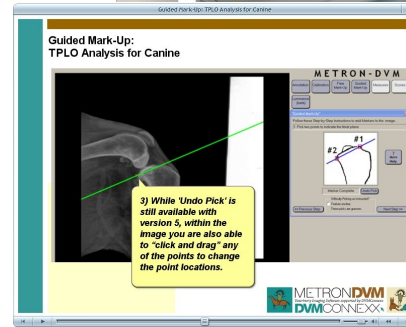

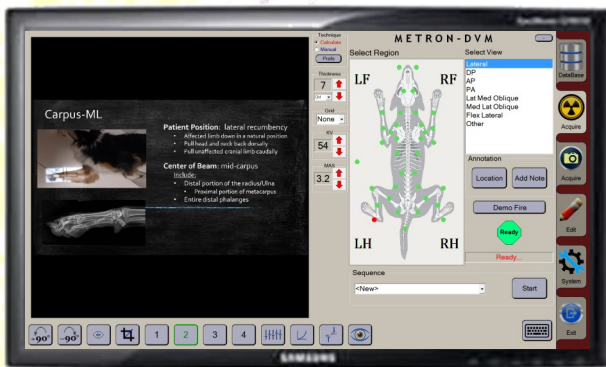

Metron AI DVM Acquisition/Review PACS:

- *ARTIFICIAL INTELLIGENCE via Metron's exclusive "Intellect Engine" for automatic Anatomical Identification/Labeling, Rotation, Cropping, Scientific Markup, and Report Generation!
- *Standard features include Zoom, Pan, Scroll, Real Size View, Multi-View, Collections, Window/Level, Histogram, Edge, Free Mark Up, Annotations, Labeling, Positioning Guide, User Programmable Exposure Sequences
- *Advanced Patented Guided Mark Up routines for VHS, DAR, TPLO/TTA, Norberg Hip, DIS, etc.
- *Advanced Anatomical Image filters and Image/Photo/Video Morphing
- *Additional View Station Licenses available
- *DICOM PACS "Push/Pull" Q/R Send & Receive functions
- *CD/DVD Burn & Multi Format export (jpg, bmp, dicom, etc)
- *Exclusive Send to WebViewer and iPad/iPhone Viewer
- *Auto-Scaler for computed measurement available

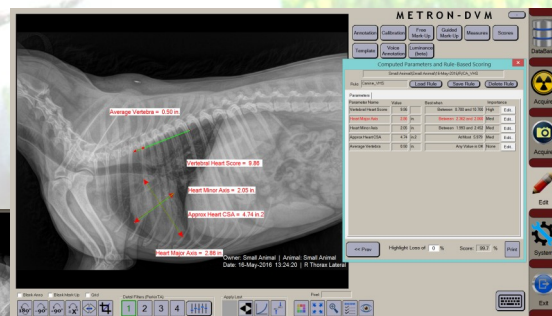

On Line Support AND Narrated Training Videos!
