

Top 10

Metron Advantages for Veterinary Application

- 1) Metron Software is very “Intuitive”; “Natural”; “everything is very easy to figure out and understand”
- 2) The Vet friendly Graphical User Interface looks and “feels” like Practice Management Software and other common software modules that associate with Veterinary medicine. The GUI is not confusing or laboratory / scientific in appearance but is actually designed to complement a busy Vets practice style; thus, making Metron, the number one software solution throughout the USA. Metron has over 2000 installations!
- 3) Excellent and Immediate Telephone and Online Support / Narrated Videos for key features / Monthly Newsletter / Local Service / After Hours Service
- 4) Unique/Exclusive (&Patented) Guided Mark Up Routines which include: Vertebral Heart Score, Norberg Hip, TTA/TPLO, DAR, Distraction index, Penn Hip & many more...
- 5) Metron employs world class imaging algorithms based on multi-frequency wavelet decomposition including wavelet de-noising
- 6) Metron Software has many key features important in Veterinary practice:
 - ✓ Straightforward Veterinary specific Database structure with import/export, merge and backup options
 - ✓ Single Screen entire client folder visible with adjustable Icons
 - ✓ Full Dicom Worklist compatibility
 - ✓ Full Dicom 3.0 Send/Receive and Query/Retrieve
 - ✓ Fully Functional as mini PACS or full PACS
 - ✓ Intelligent Image Label
 - ✓ Easy CD/DVD burning with mini Metron Viewer, mix studies and dates etc.
 - ✓ Image Stitching (multiple images)
 - ✓ Client Report and Form Generation with multiple templates
 - ✓ Quick Custom Interconnectivity to Practice Management Systems
 - ✓ Simple / Multiple Export options
 - ✓ Special features such as image morphing / 3D bone construction / multi date file collections
- 7) Multiple Veterinary Platforms within the same software module: Equine, Small Animal, Dental.
- 8) Multiple CR/DR platforms can be operated from one software license. Multiple Pictorial Skeleton layouts for easy anatomy and view selection etc: Equine, Canine, Feline, Primate, Rodent, and many more...
- 9) Only system featuring automatic radiograph calibration (when the Metron auto-scaler or Metron block used)
- 10) Metron database can also include photographs, ultrasounds, etc.
